ADD A BRAIN TO YOUR COMPRESSOR ROOM

Expand your monitoring capabilities

ECOntrol+

+ MEANS MORE BENEFITS

- Connect up to 10 compressors, making them work together efficiently.
- Reduce the pressure band and minimize unloaded running hours to achieve more energy savings.
- Get assured air supply even in case of a breakdown.
- Save maintenance costs and downtime by equalizing equipment running hours.
- Get maximum flexibility to manage complex air demand profiles.

+ MEANS MORE INSIGHTS

- Monitor all your equipment online via ICONS.
- Collect all compressed air equipment information for your local monitoring system.
- Monitor all sensors, utilities, plant equipment.

7%

ENERGY SAVINGS

Energy consumption represents
80% of the compressor's total cost of ownership.

99%
of the compressor's CO_2 emissions are related to the energy consumption.

When running unloaded, compressors still use
20% of the energy they consume at full load. ECOntrol+ reduces unloaded running hours, lowering energy costs and machine usage.
